

SAMRIDDHI ANVESHANA

Chatbot Conversation Flow

Technical & Functional Documentation
WhatsApp | Telegram | Arattai
Version 1.0 | 2026 | Internal Use Only

1. Document Overview

This document describes the complete chatbot conversation flow implemented for Samriddhi Anveshana (SA). It covers every message a user can receive, every question the bot asks, and what information is collected at each step. This is designed to work across WhatsApp, Telegram, and Arattai platforms.

1.1 Purpose

- Define the full conversation structure from first touch to final handoff
- Serve as a reference for developers integrating the flow into Flask + PostgreSQL
- Act as a guide for team members managing or updating the bot

1.2 Platforms Covered

Platform	Identifier Used	Status
WhatsApp	Phone Number	Active
Telegram	Chat ID	Active
Arattai	User ID	Active

2. Master Entry Message (First Touch)

When any user first contacts SA on any platform, the bot automatically sends the following welcome message. This is the entry point for all conversations.

2.1 Welcome Message

Step	Sender	Message Content
S-01	System	Welcome to Samriddhi Anveshana. We provide professional services in: 1) IT Services & Digital Infrastructure 2) Digital Marketing 3) 24x7 Operational Support 4) Compliance & Operational Consulting 5) Financial Services. Please reply with the number to continue.
U-01	User	User replies with: 1, 2, 3, 4, or 5

2.2 Top-Level Menu Options

Reply	Service Category	Description
1	IT Services & Digital Infrastructure	HMS, EMR, Cloud, Appointment Booking, Telemedicine
2	Digital Marketing	Website, SEO, Ads, Social Media, Patient Engagement
3	24x7 Operational Support	Report Issue, Technical Support, Monitoring
4	Compliance & Operational Consulting	Compliance Support, Audit Prep, Workflow, Analytics
5	Financial Services	Payment Gateway, Finance Automation, Digital KYC, Wealth Management

3. Category 1 — IT Services & Digital Infrastructure

When user replies '1', the bot shows the IT Services sub-menu with 5 options. Each option opens a structured data collection flow of 6 questions.

3.1 IT Services Sub-Menu

Reply	Service	What it covers
1	Hospital Management System (HMS)	Full HMS implementation for hospitals and clinics
2	EMR / EHR Systems	Electronic medical and health record setup
3	Cloud & Cybersecurity	Cloud hosting setup and security solutions
4	Appointment Booking System	Online and offline patient booking systems
5	Telemedicine Integration	Video/audio consultation setup

3.2 HMS — Information Collected

Triggered when user selects option 1 from the IT Services menu.

Q #	Question / Field	Why it is collected
1	Hospital / clinic name	To identify the client and personalise the proposal
2	Location	For on-site support planning and regional compliance
3	Number of beds / patients per day	To size the HMS system correctly
4	Need billing & inventory modules? (Yes/No)	To determine scope and cost of implementation
5	Currently using any software? (Yes/No)	To plan data migration if existing system is present
6	Contact number	For the SA team to follow up with the client

3.3 EMR / EHR — Information Collected

Q #	Question / Field	Why it is collected
1	Type of healthcare facility	Different facilities have different EMR requirements
2	Cloud-based or local system?	Determines architecture and hosting approach

Q #	Question / Field	Why it is collected
3	Number of doctors / users	For licensing and access control planning
4	Need data migration from old system? (Yes/No)	Migration adds complexity and cost to the project
5	Compliance requirements? (NABH/NABL)	Ensures the system meets certification standards
6	Contact details	For follow-up by the SA team

3.4 Cloud & Cybersecurity — Information Collected

Q #	Question / Field	Why it is collected
1	Current system type	To assess what cloud services are needed
2	Cloud hosting or security only?	Defines scope: full cloud vs security audit
3	Previous security issues? (Yes/No)	Indicates vulnerability level and urgency
4	Approximate data size	For storage planning and cost estimation
5	Required security level? (Basic/Advanced)	Determines tools and effort required
6	Contact number	For follow-up by the SA team

3.5 Appointment Booking System — Information Collected

Q #	Question / Field	Why it is collected
1	Hospital / clinic name	To identify the client
2	Online booking needed? (Yes/No)	Determines if web/app development is required
3	Number of doctors	For calendar and slot management configuration
4	Preferred platform? (Web / App / Both)	Guides development platform selection
5	Need SMS / WhatsApp reminders? (Yes/No)	For notification integration planning
6	Contact details	For follow-up by the SA team

3.6 Telemedicine Integration — Information Collected

Q #	Question / Field	Why it is collected
1	Type of consultations? (Video / Audio / Both)	For video/audio infrastructure planning
2	Number of doctors	For server load and license estimation
3	Payment integration needed? (Yes/No)	Adds payment gateway scope to the project
4	Target audience (local / global)	Determines latency, language, and compliance needs
5	Existing system? (Yes/No)	For integration vs fresh build decision
6	Contact number	For follow-up by the SA team

4. Category 2 — Digital Marketing

When user replies '2', the bot presents 5 digital marketing service options. Each leads to a 6-question data collection flow.

4.1 Digital Marketing Sub-Menu

Reply	Service	What it covers
1	Website Development	Building or redesigning business/hospital websites
2	SEO Services	Improving search engine rankings and visibility
3	Google & Meta Ads	Paid advertising campaigns on Google and Facebook
4	Social Media Management	Content creation and platform management
5	Patient Engagement Campaigns	WhatsApp/SMS/Email campaigns targeting patients

4.2 Website Development — Information Collected

Q #	Question / Field	Why it is collected
1	Business / hospital name	Client identification
2	Already have a website? (Yes/No)	Determines redesign vs new build
3	Type of website? (Basic / Advanced / E-commerce)	Scoping and pricing
4	Required pages (Home, About, Services, etc.)	Content and design planning
5	Booking / payment integration needed? (Yes/No)	Adds technical complexity and cost
6	Contact details	For follow-up by the SA team

4.3 SEO Services — Information Collected

Q #	Question / Field	Why it is collected
1	Website URL	For audit and current ranking analysis
2	Target location	For local vs national SEO strategy
3	Target keywords (if any)	To define the focus of SEO campaign

Q #	Question / Field	Why it is collected
4	Current traffic status (Low / Medium / High)	To assess starting point and set realistic goals
5	Competitors (if known)	For competitive analysis
6	Contact number	For follow-up by the SA team

4.4 Google & Meta Ads — Information Collected

Q #	Question / Field	Why it is collected
1	Business type	To design relevant ad creatives and targeting
2	Monthly ad budget	To set realistic campaign expectations
3	Target audience / location	For precise ad targeting setup
4	Goal? (Leads / Traffic / Sales)	To select correct campaign objective
5	Previous ads experience? (Yes/No)	To decide whether basic or advanced setup is needed
6	Contact details	For follow-up by the SA team

4.5 Social Media Management — Information Collected

Q #	Question / Field	Why it is collected
1	Platforms (Instagram / Facebook / etc.)	Each platform needs separate content strategy
2	Current followers	To set growth targets and benchmarks
3	Posting frequency needed	For content calendar planning
4	Content type? (Reels / Posts / Both)	For production planning and tools
5	Branding requirements	To maintain visual consistency
6	Contact number	For follow-up by the SA team

4.6 Patient Engagement Campaigns — Information Collected

Q #	Question / Field	Why it is collected
1	Target audience type	To design relevant campaign messaging

Q #	Question / Field	Why it is collected
2	Campaign goal	To measure success metrics
3	Preferred channel (WhatsApp / SMS / Email)	To determine technical integration needed
4	Campaign duration	For scheduling and resource planning
5	Need automation? (Yes/No)	Determines if bot/automation setup is required
6	Contact details	For follow-up by the SA team

5. Category 3 — 24x7 Operational Support

When user replies '3', the bot presents 3 support options. This category handles live issues and service requests.

5.1 Support Sub-Menu

Reply	Option	Purpose
1	Report an Issue	For clients experiencing problems with existing SA systems
2	Request Technical Support	For planned or ad-hoc support assistance
3	Monitoring Services	For setting up continuous system monitoring

5.2 Report an Issue — Information Collected

Q #	Question / Field	Why it is collected
1	Issue type	To route the ticket to the correct department
2	System affected	To identify which SA product/service is impacted
3	When did it occur?	For timeline tracking and root cause analysis
4	Urgency level? (Low / Medium / High)	To prioritise response SLA
5	Screenshot (if possible)	Visual evidence speeds up diagnosis
6	Contact number	For the support team to call back immediately

5.3 Technical Support Request — Information Collected

Q #	Question / Field	Why it is collected
1	Type of support needed	To assign the right technical resource
2	System details	For the technician to prepare before the session
3	Preferred time	For scheduling the support session
4	Issue description	To document the problem clearly
5	Priority level	For resource allocation
6	Contact details	For confirmation and follow-up

5.4 Monitoring Services — Information Collected

Q #	Question / Field	Why it is collected
1	What system needs monitoring?	To set up the correct monitoring agent
2	Current setup	For compatibility and integration planning
3	Alert preferences	How and when the client wants to be notified
4	Reporting frequency	For dashboard and report schedule setup
5	Number of systems	For pricing and resource estimation
6	Contact number	For the SA team to set up onboarding

6. Category 4 — Compliance & Operational Consulting

When user replies '4', the bot shows 4 consulting service options. This category handles certification, audit, and workflow improvement requests.

6.1 Consulting Sub-Menu

Reply	Service	Purpose
1	Compliance Support	NABH/NABL certification guidance and documentation
2	Audit Preparation	Preparing clients for upcoming audits
3	Workflow Optimization	Streamlining internal hospital/clinic processes
4	Performance Analytics	Tracking KPIs with dashboards and reports

6.2 Compliance Support — Information Collected

Q #	Question / Field	Why it is collected
1	Hospital type	Different types have different compliance requirements
2	Required certification (NABH / NABL)	To determine applicable standards
3	Current compliance status	To identify gaps and plan the roadmap
4	Documentation available? (Yes/No)	Determines effort needed to build documentation
5	Timeline	For planning milestones and resource allocation
6	Contact details	For follow-up by the SA consulting team

6.3 Audit Preparation — Information Collected

Q #	Question / Field	Why it is collected
1	Audit type	To align preparation with specific audit requirements
2	Scheduled date	To create a backward-planned preparation timeline
3	Current readiness level	To assess how much work is needed
4	Required documentation	To identify documentation gaps
5	Need training? (Yes/No)	To plan staff readiness sessions
6	Contact number	For follow-up scheduling

6.4 Workflow Optimization — Information Collected

Q #	Question / Field	Why it is collected
1	Department to optimize	To focus the analysis on the right area
2	Current challenges	To understand pain points and bottlenecks
3	Expected improvements	To set goals and success metrics
4	Number of staff	For process mapping and change management scope
5	Tools currently used	For integration and compatibility planning
6	Contact details	For follow-up by the SA team

6.5 Performance Analytics — Information Collected

Q #	Question / Field	Why it is collected
1	What metrics do you track?	To understand current reporting and identify gaps
2	Need dashboard? (Yes/No)	To determine if a visual BI tool is required
3	Data source	For integration with the analytics system
4	Reporting frequency	For scheduling automated reports
5	Goals	To align analytics output with business objectives
6	Contact number	For follow-up by the SA analytics team

7. Category 5 — Financial Services

When user replies '5', the bot presents 4 financial service options covering payment solutions, automation tools, KYC systems, and wealth management advisory.

7.1 Financial Services Sub-Menu

Reply	Service	What it covers
1	Payment Gateway Integration	Setting up online payment solutions for businesses
2	Finance Automation Tools	Automating invoicing, reconciliation and financial workflows
3	Digital KYC Systems	Electronic Know Your Customer verification setup
4	Wealth Management Advisory	Investment planning, mutual funds, tax saving and financial planning

7.2 Payment Gateway Integration — Information Collected

Q #	Question / Field	Why it is collected
1	Business / company name	To identify the client and personalise the proposal
2	Type of business? (Retail / Healthcare / E-commerce / Other)	To recommend the right payment gateway provider
3	Expected monthly transaction volume?	For gateway tier selection and pricing
4	Need UPI / card / wallet support? (specify)	To configure the required payment modes
5	Existing website or app? (Yes/No)	To plan integration approach
6	Contact details	For follow-up by the SA financial team

7.3 Finance Automation Tools — Information Collected

Q #	Question / Field	Why it is collected
1	Business type and size	To select the appropriate automation tool
2	Which processes to automate? (Invoicing / Payroll / Reconciliation)	To scope the automation modules required
3	Current accounting	For integration compatibility planning

Q #	Question / Field	Why it is collected
	software? (Tally / Zoho / Other / None)	
4	Number of transactions per month (approx.)	For system sizing and performance planning
5	Need staff training? (Yes/No)	To plan onboarding and training sessions
6	Contact number	For follow-up by the SA team

7.4 Digital KYC Systems — Information Collected

Q #	Question / Field	Why it is collected
1	Organisation type? (NBFC / Bank / Fintech / Healthcare)	Different sectors have different KYC compliance rules
2	Expected number of KYC verifications per month	For system capacity and pricing
3	Document types needed? (Aadhaar / PAN / Passport / Other)	To configure the document verification modules
4	Need video KYC? (Yes/No)	Video KYC requires additional infrastructure
5	Existing system to integrate with? (Yes/No)	For API integration planning
6	Contact details	For follow-up by the SA team

7.5 Wealth Management Advisory — Information Collected

Q #	Question / Field	Why it is collected
1	Individual or corporate client?	To assign the right advisor and product set
2	Investment goal? (Wealth growth / Tax saving / Retirement / Other)	To recommend suitable financial instruments
3	Risk appetite? (Low / Medium / High)	For portfolio construction and product selection
4	Approximate investment amount or monthly SIP budget	To filter relevant mutual funds and plans
5	Existing investments?	To review current portfolio before advising

Q #	Question / Field	Why it is collected
	(Yes/No)	
6	Contact number	For the SA advisor to schedule a consultation

8. Final Auto-Response (All Flows)

Every conversation — regardless of which service category or sub-option the user chose — ends with the same confirmation message once all 6 questions are answered.

Step	Sender	Message Content
S-FINAL	System	Thank you for contacting Samriddhi Anveshana. Our team will review your request and get in touch shortly. For immediate assistance, please call: XXXXXXXX

This message serves three purposes:

- Confirms the user's information was received successfully
- Sets expectation that the SA team will follow up
- Provides a direct call number for urgent needs

9. Data Stored in PostgreSQL

Every conversation interaction is saved to the database. Below is what gets stored and why.

9.1 Users Table

Column	Type	Purpose
id	Auto number	Unique identifier for each user
phone	Text	Phone number (WhatsApp), Chat ID (Telegram), User ID (Arattai)
platform	Text	Which platform the user came from
created_at	Timestamp	When the user first contacted SA

9.2 Messages Table

Column	Type	Purpose
id	Auto number	Unique message record ID
user_id	Reference	Links message to the user who sent it
message	Text	The exact text the user typed
response	Text	The exact reply the bot sent back
platform	Text	WhatsApp / Telegram / Arattai
created_at	Timestamp	Time the message was sent

10. Summary — Complete Flow at a Glance

Category	Sub-Services	Questions Asked	Data Stored
IT Services	HMS, EMR, Cloud, Booking, Telemedicine	6 per service	Name, location, system details, contact
Digital Marketing	Website, SEO, Ads, Social Media, Campaigns	6 per service	Business info, goals, budget, contact
Operational Support	Issue Report, Tech Support, Monitoring	6 per service	System, urgency, timeline, contact
Compliance & Consulting	Compliance, Audit, Workflow, Analytics	6 per service	Facility type, status, timeline, contact
Financial Services	Payment Gateway, Finance Automation, Digital KYC, Wealth Management	6 per service	Business type, goals, volume, contact

Total services: 21 sub-services across 5 categories, each with 6 questions = up to 126 data points collectible per full journey.

11. Key Implementation Notes

- All conversations start from a single entry message — same across WhatsApp, Telegram, and Arattai
- User replies with a number (1-5) to navigate — no free text needed at menu steps
- Each service collects exactly 6 data points from the user before ending
- All conversations end with the same final thank you message regardless of path
- Every message and reply is saved in PostgreSQL for analytics and follow-up
- The SA operations team receives the lead data and follows up manually or through CRM
- Contact number is always the last question collected — ensuring maximum engagement before asking for personal info

12. Full Conversation Flow Tree

This section shows the complete branching structure of the chatbot — from the very first message to every possible end point. Read top to bottom. Each indent level represents one step deeper into the conversation.

Legend

Symbol / Color	Meaning	Example
ENTRY	First message sent by the bot to every new user	<i>Welcome to Samriddhi Anveshana...</i>
MENU	Bot sends a numbered list — user replies with a number	<i>Reply 1 for IT Services, 2 for Digital Marketing...</i>
Q1-Q6	Bot asks 6 questions one by one — user types their answer	<i>What is your hospital name? / How many beds?...</i>
END	Bot sends final thank-you message and closes the flow	<i>Thank you! Our team will get in touch shortly.</i>

START: User first messages SA on any platform
Bot sends welcome message automatically

User replies: 1 → IT Services & Digital Infrastructure
Bot shows IT Services sub-menu (5 options)

User replies: 1 → Hospital Management System (HMS)
Bot begins 6-question data collection

Q1: What is your hospital / clinic name?

Q2: What is your location?

Q3: Number of beds / patients per day?

Q4: Do you need billing & inventory modules? (Yes/No)

User replies: 5 → Patient Engagement Campaigns

Bot begins 6-question data collection

Q1: Target audience type?

Q2: Campaign goal?

Q3: Preferred channel? (WhatsApp / SMS / Email)

Q4: Campaign duration?

Q5: Need automation? (Yes/No)

Q6: Contact details?

END: Thank you! Our team will contact you shortly.

User replies: 3 → 24x7 Operational Support

Bot shows Support sub-menu (3 options)

User replies: 1 → Report an Issue

Bot begins 6-question data collection

Q1: Issue type?

Q2: System affected?

Q3: When did it occur?

Q4: Urgency level? (Low / Medium / High)

Q5: Screenshot (if possible)?

Q6: Contact number?

END: Thank you! Our team will contact you shortly.

User replies: 2 → Request Technical Support

Bot begins 6-question data collection

Q1: Type of support needed?

Q2: System details?

Q3: Preferred time?

Q4: Issue description?

Q5: Priority level?

Q6: Contact details?

END: Thank you! Our team will contact you shortly.

User replies: 3 → Monitoring Services

Bot begins 6-question data collection

Q1: What system needs monitoring?

Q2: Current setup?

Q3: Alert preferences?

Q4: Reporting frequency?

Q5: Number of systems?

Q6: Contact number?

END: Thank you! Our team will contact you shortly.

User replies: 4 → Compliance & Operational Consulting

Bot shows Consulting sub-menu (4 options)

User replies: 1 → Compliance Support

Bot begins 6-question data collection

Q1: Hospital type?

Q2: Required certification? (NABH / NABL)

Q3: Current compliance status?

Q4: Documentation available? (Yes/No)

Q5: Timeline?

Q6: Contact details?

END: Thank you! Our team will contact you shortly.

User replies: 2 → Audit Preparation

Bot begins 6-question data collection

Q1: Audit type?

Q2: Scheduled date?

Q3: Current readiness level?

Q4: Required documentation?

Q5: Need training? (Yes/No)

Q6: Contact number?

END: Thank you! Our team will contact you shortly.

User replies: 3 → Workflow Optimization

Bot begins 6-question data collection

Q1: Department to optimize?

Q2: Current challenges?

Q3: Expected improvements?

Q4: Number of staff?

Q5: Tools currently used?

Q6: Contact details?

END: Thank you! Our team will contact you shortly.

User replies: 4 → Performance Analytics

Bot begins 6-question data collection

Q1: What metrics do you track?

Q2: Need dashboard? (Yes/No)

Q3: Data source?

Q4: Reporting frequency?

Q5: Goals?

Q6: Contact number?

END: Thank you! Our team will contact you shortly.

User replies: 5 → Financial Services

Bot shows Financial Services sub-menu (4 options)

User replies: 1 → Payment Gateway Integration

Bot begins 6-question data collection

Q1: Business / company name?

Q2: Type of business? (Retail / Healthcare / E-commerce / Other)

Q3: Expected monthly transaction volume?

Q4: Need UPI / card / wallet support? (specify)

Q5: Existing website or app? (Yes/No)

Q6: Contact details?
